Syed Kashif Shah Bukhari

Denim Professional (Operations)

Objective

To leverage my interpersonal skills and professional expertise in achieving organizational goals, with a strong focus on enhancing customer satisfaction and delivering exceptional customer experiences.

Experiences

Mill Expansion & Technical Projects Leadership

- Directed large-scale **mill expansion projects**, including construction of new production halls, utility setups, and supporting infrastructure.
- Spearheaded **installation of new weaving, dyeing, and finishing machines**, expanding overall mill capacity and diversifying fabric range.
- Executed **machine modification and upgradation projects** to enhance productivity, reduce downtime, and extend machine life.
- Oversaw **utility expansions**, including new **boilers, compressors, generators, and chillers**, ensuring uninterrupted power and steam supply.
- Supervised the **installation and commissioning of advanced ETP (Effluent Treatment Plant)** to meet international environmental compliance standards.
- Implemented **energy-efficient systems** (VFDs, condensate recovery, waste heat utilization) across boiler, compressor, and production units, reducing utility cost per meter.
- Coordinated with civil engineering teams for **new construction projects**, including production floors, warehouses, and administrative buildings.
- Led vendor negotiations, planning, and commissioning schedules for **multi-million-dollar machinery investments**.
- Ensured smooth **integration of new equipment into existing production lines**, minimizing disruption during expansion phases.
- Directed cross-functional project teams (engineering, production, utility, and quality) to deliver expansions on-time and within budget.

Kassim Textiles (Pvt) Ltd.
Senior General Manager Mill
Oct 2016 – Till Now

Major Brands and Customers:

Successfully collaborated with leading global brands, including Levi's, C&A, Kontoor, H&M, Inditex, Tom Tailor, Next, and American Eagle, delivering high-quality denim solutions.

Core Responsibilities

- Led end-to-end denim fabric manufacturing operations from yarn preparation to finished fabric, ensuring efficiency and cost-effectiveness.
- Directed production planning and scheduling to optimize loom utilization, reduce bottlenecks, and meet customer delivery timelines.
- Implemented lean manufacturing practices to minimize waste, improve productivity, and reduce operating costs.
- Monitored fabric quality across all stages (spinning, weaving, dyeing, finishing) to ensure compliance with international standards.
- Supervised quality control systems and drove continuous improvement initiatives to achieve zero-defect production.
- Coordinated with R&D and merchandising teams for development of new fabric concepts, finishes, and value-added processes.
- Controlled overall production costs by streamlining processes, monitoring KPIs, and negotiating with suppliers for raw materials and chemicals.
- Oversaw manpower management including recruitment, training, and performance evaluation of production staff.
- Ensured compliance with safety, health, and environmental (SHE) regulations across all departments of the mill.
- Managed utility operations including power generation, boilers, compressors, and effluent treatment plants for uninterrupted production.

- Directed preventive and predictive maintenance programs to reduce machine downtime and increase equipment life.
- Coordinated with supply chain and procurement teams to ensure timely availability of yarn, chemicals, dyes, and spare parts.
- Analyzed production data, prepared MIS reports, and presented operational performance to senior management.
- Built and managed budgets, controlled expenses, and improved cost-per-meter benchmarks for denim production.
- Fostered cross-department collaboration between production, quality, planning, and engineering teams.
- Led audits and certifications including ISO, Oeko-Tex, ZDHC, and sustainability initiatives to enhance compliance and customer trust.
- Implemented digital tools and ERP systems for production planning, tracking, and reporting.
- Championed energy efficiency projects to reduce consumption of gas, electricity, and water per meter of fabric.
- Handled administration of mill facilities including security, housekeeping, canteen, and labor welfare.
- Represented the mill in customer visits, audits, and technical meetings to showcase operational capabilities and quality standards.

Artistic Fabric Mills II
General Manager Mill
Feb 2013 – Oct 2016

Core Responsibilities

- While overall responsibilities were similar to role mentioned above, scope was expanded with added focus on:
- Leading mill expansion projects, including installation of new machinery and capacity enhancement initiatives.
- Driving sustainability programs such as water recycling, chemical management, and energy efficiency improvements.
- Managing customer audits, certifications, and compliance with international labor, quality, and environmental standards.
- Introducing automation and ERP-based production monitoring systems for better control and efficiency.

Beximco Textiles Bangladesh
Sr. General Manager & Plant Head
October 2008 – Jan 2013

Core Responsibilities

- While overall denim mill responsibilities remained same, scope broadened with additional focus on:
- Acting as Plant Head, taking overall responsibility for smooth denim mill operations, workforce management, and utilities.
- Coordinating closely with the garment unit teams to align fabric quality, finishes, and developments with buyer requirements.
- Leading joint fabric–garment development initiatives to ensure end-product consistency and innovation for global customers.
- Representing both mill and garment unit during buyer visits and audits, focusing on quality assurance and product development synergy.
- Strengthening collaboration between R&D, merchandising, and garment technical teams to deliver fast-track sampling and bulk approvals.

Artistic Milliners Unit 5.
General Manager
May 2004 – October 2008

Core Responsibilities

- Core responsibilities were similar, with additional focus on:
- Leading turnaround initiatives in an underperforming mill by improving efficiency, reducing fabric rejections, and stabilizing production flow.
- Introducing advanced denim dyeing and finishing technologies to diversify product range and enhance competitiveness.
- Establishing performance-based KPIs for departmental heads to strengthen accountability and productivity.
- Driving digital transformation projects, including ERP integration and machine data analytics for better decision-making.
- Building strong relationships with international customers through direct technical support and development presentations.
- Overseeing compliance with sustainability roadmaps (ZDHC, Higg Index, GOTS, etc.) to meet leading brand requirements.

Mekotex Pvt Ltd
General Manager / Production Manager
Feb 2001 – Apr 2004

Core Responsibilities

- Initially joined as **Production Manager**, overseeing day-to-day denim production activities including weaving, dyeing, and finishing, ensuring quality standards and timely execution of production plans.
- Streamlined production processes by implementing lean manufacturing practices, reducing waste, and improving machine efficiency.
- Coordinated closely with PPC, QA, and maintenance teams to ensure uninterrupted operations and achievement of delivery targets.
- Promoted to **General Manager** based on performance, taking full responsibility for mill operations including production, quality, planning, utilities, and administration.
- Directed capacity expansion projects, modernization initiatives, and ERP-based monitoring systems to enhance productivity and transparency.
- Managed cost control & budgeting accountability, aligning operational results with corporate objectives.
- Strengthened buyer relations through participation in audits, compliance reviews, and product development coordination.
- Led workforce development by mentoring departmental heads, enforcing safety protocols, and ensuring cross-department collaboration.
- Drove sustainability initiatives with a focus on reducing water, energy, and chemical consumption per meter of fabric.

Artistic Denim Mill
Quality Controller
Dec 1993 – Feb 2001

Core Responsibilities

- Monitored fabric quality at weaving, dyeing, finishing, and inspection stages to ensure compliance with buyer standards.
- Conducted in-line and final inspections to identify defects, control shade variations, and minimize reprocessing.
- Coordinated with production teams to implement corrective actions and prevent recurring quality issues.
- Ensured adherence to quality parameters such as GSM, shrinkage, skew, shade, tensile strength, and tear strength.
- Prepared quality reports, maintained records, and shared findings with management for continuous improvement.
- Assisted in fabric development trials, verifying performance against buyer specifications before bulk approval.
- Worked closely with garment unit QA teams to ensure fabric consistency throughout stitching and washing.
- Supported audits from international buyers by demonstrating mill quality systems and procedures.

Qualifications

- MBA in textiles from Preston University
- Bachelors of Arts from University of Karachi
- Diploma of Associate Engineering in Textiles from GCT

Technical Trainings

- Special Textile Course of Production Management
  (Textile institute of Research & Development Center Government of Pakistan)
  ISO-9000 Awareness
- Special Course of Supply Chain Management
