## Career Objective:

Be a perfect , successful  and honest professional through knowledge , integrity and endeavor.

## Career Summary:

I am an MBA-IBA-DU and a graduate of BUET with a degree in Civil Engineering, equipped with the necessary qualifications and extensive professional experience. I have had the privilege of working with several renowned MNCs including DHL Worldwide Express (BD) Ltd.,SINGER, Carmens SPA (Netherlands) & PDS Multinational Group (UK).I worked for Sunman Group, Mondol Group,Al-Muslim Group,Dekko Isho Group, Reliance,PBL and now working as Executive Director in Ellipse Group

## Special Qualification:

CIVIL ENGINEER - BUET Graduate | FIEB-12498 | Executive MBA-IBA-DU
Strategic Leadership, Change Management, and Business Development
Project Management and Operation,HR,Procurement,Business and Financial Leadership,Marketing Branding,Sales.

## Employment History:

**Total year of experience:** 24.6 yrs

**1. Executive Director (2.5yrs)**
(1 Mar 2024 - Continuing)

**ELLIPSE GROUP**
Area of Expertise:
Marketing (0.4 yr), Operation (0.4 yr), Leadership (0.4 yr)

Duties/Responsibilities

As Executive Director, I lead the strategic, operational, and transformational functions of Ellipse Group—a multidisciplinary organization operating across real estate development, Contractor, Construction Firm, Agro-business, EPC contracting, engineering and design consultancy, renewable

energy, fire safety, and trading. Reporting to the Board and Managing Director, I translate business vision into executable strategies that drive growth, innovation, and operational excellence.Actually I believe in  performance of overall , collective and integrated responsibility as Executive Director for the best and sustainable future business growth.

1. Strategic Leadership, Change Management, and Business Development

Being The Executive Director (ED) I  am responsible for shaping the organization`s long-term vision, leading strategic planning, driving transformation initiatives, and expanding business opportunities. The role demands proactive leadership in adapting to market trends, embracing technology, fostering innovation, and identifying avenues for sustainable growth. We work with Government authorities, big conglomerates, Group of Companies, Industries, MNCs, Real estate and land development sector.

Key Responsibilities:

• Strategic Planning & Execution: Develop and implement enterprise-wide strategies and operational roadmaps aligned with the company`s long-term goals.

• Organizational Transformation: Lead change management initiatives across the organization, ensuring alignment of structure, systems, and culture with strategic priorities.

• Innovation & Digital Adaptability: Promote digital transformation by integrating emerging technologies and fostering a culture of innovation and continuous learning.

• Operational Restructuring: Oversee restructuring processes to improve efficiency, reduce costs, and enhance organizational responsiveness.

• Cultural Leadership: Cultivate a values-driven, agile, and performance-oriented culture to support transformation and business excellence.

Business Development Responsibilities:

• Growth Strategy: Identify, evaluate, and pursue new business opportunities across core and emerging sectors, including real estate, engineering consultancy, fire safety, solar, and power plant construction.

• Client Relationship Management: Build and maintain strong relationships with key clients, government bodies, development partners, and industry stakeholders.

• Market Expansion: Lead initiatives to expand into new markets or service areas, leveraging market research and competitive analysis.

• Partnership Development: Forge strategic alliances and joint ventures to enhance capabilities and access new projects or technologies.

• Revenue Diversification: Explore and implement innovative business models and revenue streams in alignment with market demand and organizational strengths.

2. Project Management and Operational Excellence

As ED I  am responsible for executing real estate and infrastructure projects on time, within budget, and at expected quality. The ED ensures compliance and introduces modern construction methodologies.

Responsibilities:

• Manage end-to-end project execution from land acquisition to handover-RCC and PEB Steel Buildings-Industrial, Commercial

• Real Estate Project in RAJUK area and in other Districts

• Ensure compliance with civil, electrical, environmental, and fire safety codes.

• Introduce lean, modular, and efficient construction practices.

• Digitize site tracking, billing, and procurement coordination.

• From Green Field to completed project-All planning, design, drawing, approval, liaison, project execution, management of engineering, admin team with other operational stakeholders.

3. Business and Financial Leadership

As ED I develop financial strategies and oversees the company's fiscal health, applying business acumen alongside engineering expertise.

Tasks include:

• Prepare and monitor budgets, forecasts, and cost controls.

• Oversee financial planning, restructuring, and investments.

• Manage treasury operations and fundraising.

• Analyze financial performance and report to the board.

4. Innovation, Sustainability, and Green Transformation

Sustainability is central to my role. They lead innovation in engineering, energy systems, and environmentally responsible practices.

Duties:

• Promote solar, BIPV, and other clean energy technologies.

• Lead green certification processes (LEED, USGBC).

• Use BIM, AI tools, and energy modeling to improve project outcomes.

• Foster a culture of innovation .

• Establishing Solar Power Plant as EPC.

• Waste management consultancy

• STP, ETP

5. Marketing, Branding, and Customer Engagement

As ED I direct marketing and branding strategies to enhance lead generation and market presence across sectors.

Key responsibilities:

• Lead integrated digital and offline marketing campaigns.

• Reposition brand for target segments (e.g., NRBs, institutional buyers).

• Supervise CRM, automation, and customer engagement tools.

• Build strong client, investor, and regulator relationships.

6. HR Leadership and Workforce Transformation

As ED I shape a skilled, motivated, and future-ready workforce.

Tasks include:

• Lead recruitment, training, and succession planning.

• Drive upskilling in digital tools, compliance, and energy systems.

• Promote ethics, leadership, and performance culture.

• Ensure operational training in fire safety, equipment, and EHS.

7. Quality, Compliance, and Risk Management

As ED I ensure that operations meet legal, regulatory, and quality standards across all domains.

Responsibilities:

• Oversee ISO certifications and internal audits.

• Enforce fire safety and environmental compliance.

• Lead risk assessments, control reviews, and crisis management.

• Maintain all statutory documentation and clearances.

8. Client Relations and Stakeholder Management

As ED I manage external relationships vital for business continuity and reputation.

Duties:
• Negotiate contracts, MoUs, and joint ventures.
• Liaise with government bodies and communities.
• Ensure client satisfaction and handle post-handover issues.
• Present proposals and updates to investors and the board.
9. Cross-functional Supervision and Performance Monitoring
I ensure cohesive operation and coordination across departments.
Core tasks:
• Conduct reviews with heads of civil, electrical, environmental, HR, and finance.
• Integrate performance dashboards and MIS systems.
• Align all teams with strategic objectives.
• Resolve interdepartmental challenges proactively.
10. Governance, Reporting, and Institutional Development
As a senior executive, I uphold governance, transparency, and institutional growth.
Key tasks:
• Prepare strategic and compliance reports for the Board.
• Implement SOPs, policy frameworks, and delegation systems.
• Lead board-driven initiatives like digital transformation.
• Participate in audits, planning sessions, and investor briefings.

**2. General Manager (Operations) (0.9yrs)**
(2 Apr 2023 - 29 Feb 2024)

**DEKKO ISHO GROUP**
Area of Expertise:
Project Management (0.8 yr)

Duties/Responsibilities

Operations, Development & Construction:
• Oversee all engineering and maintenance operations, construction planning, management, and implementation across the group.
• Serve as the Head of the Engineering and Construction Department, responsible for engineering operations, logistics, and procurement.
• Support the factory maintenance team to create an optimal working environment.
• Lead green building construction initiatives, ensuring compliance with sustainability standards.
Compliance:
• Address and resolve audit-related issues, buyer concerns, and compliance with RSC, ACCORD, ALLIANCE standards, including structural, fire, and electrical safety issues.
• Manage communications with buyers and third parties regarding audits, certifications, and compliance matters.
• Lead a large team of engineers, managers, and technicians within the group.
Consultant Responsibilities:
• Advise the Chairman on the procurement of fire safety installations (e.g., fire doors, extinguishers,

fire alarm systems, fire hydrants).

• Provide consultancy for the procurement of lifts, generators, and other critical industrial equipment.

• Assist the Chairman in sourcing services related to construction and development, including selecting and deploying consultants for architectural, structural, MEP, and LEED USGBC Certification for green building.

• Facilitate the engagement of civil contractors, pre-fabricated building erectors, and suppliers for construction materials.

• Advise on the recruitment of technical personnel, such as engineers and technicians.

• Ensure the quality of goods, materials, and services supplied, providing regular inspections and assessments.

Project Development & Management:

• Oversee industrial project development from the ground up, ensuring a structured operational execution plan and a monitoring system for project development, planning, design, and construction procurement activities.

• Prepare feasibility studies and project management models to guide the process.

• Implement cost control measures through effective inventory management.

• Supervise site works, ensuring alignment with drawings, specifications, and quality standards.

Tender & Vendor Management:

• Lead the tendering and vendor management process, ensuring compliance and quality control in all construction-related activities.

• Manage and supervise civil works, construction, and finishing tasks for apartment buildings across multiple sites, ensuring high-quality aesthetics and meeting tight deadlines.

• Expert in managing finishing projects under challenging time constraints

**3. Project Director (3.1yrs)**

(19 Mar 2020 - 31 Mar 2023)

**DHL Worldwide Express (BD) Pvt. Ltd**

Area of Expertise:

Project Management (0.6 yr), Procurement (0.6 yr), Planning and monitoring (3.0 yr)

Duties/Responsibilities

Duties/Responsibilities

Construction Management and Project Oversight:

#Project Planning, Project Execution, Project Handover and Ensure that facility is  is fully operational, functional and integrated to  Go Live as per the project schedule despite pandemic.

#Responsible for  project lifecycle from recruiting the project team ( Project Management Consultant, General Contractor, Interior  contractor, Material Handling System, MHS Vendor, MHS, Data Centre, MEP Vendor etc.),  design, procurement, construction/assembly, commissioning, integration, and handover. Country office along with Central Facility for the word leader Logistic Brand.

# Control and manage all construction activities for commercial compound development, ensuring compliance with international standards.

# Oversee the construction of PEB structures, RCC structures, utility buildings, roads, central AC

systems, material handling mechanical installations, safety systems (FPS and FDS), landscaping, and drainage systems.

# Lead the Bangladesh Facility Relocation Project for CIS (Certified International Specialists), a top-tier international logistics company, in Dhaka.

Project Team and Stakeholder Management:

# Direct and manage the project team, ensuring the successful relocation of the BD facility to meet user requirements, within agreed budgets, schedules, and quality standards.

# Collaborate closely with cross-functional teams, including Engineering, Procurement, Real Estate, Legal, IT, Security, Operations, Finance, and Programmes, to ensure a unified effort toward project success.

# Motivate and guide team members to achieve project milestones according to the agreed timeline and budget.

# Organize and lead board meetings and gate reviews, keeping stakeholders informed on project progress and securing necessary approvals for work orders.

# Ensure key stakeholder and senior management support for timely decisions and appropriate resource allocation.

# Serve as a communication bridge between the project team, regional offices, and senior management.

Procurement and Supplier Relations:

# Collaborate with Procurement and Engineering leaders to select suppliers that provide the best value for DHL.

# Build and maintain strong relationships with suppliers, staying informed on the latest technologies and industry trends.

# Manage suppliers to ensure the highest standards of service and product delivery.

# Coordinate activities with external project management consultants, technical consultants (structural engineers, architects, MEP specialists), and contractors to ensure smooth project execution.

# Identify and explore opportunities for green building solutions within the scope of the project.

Regulatory Compliance and Coordination:

# Ensure compliance with local government regulations, including codes, laws, and standards, as well as with the requirements of regulatory bodies such as the Airport Authority.

# Foster relationships with local authorities and regulatory bodies to secure project approvals and gain their support.

# Proactively manage the project#s budget and schedule, ensuring adherence to the Project Initiation Document (PID) and implementing proper project management processes.

# Provide regular project updates and reporting to management and stakeholders.

# Define and assign clear responsibilities to team members, including consultants.

Quality Control and Conflict Resolution:

# Monitor and ensure that work conducted by external consultants, contractors, and suppliers meets specifications and quality requirements.

# Conduct quality checks on project deliverables and manage risks, cost control, and other significant project issues in compliance with the PID.

# Resolve conflicts and prioritize site requirements, escalating issues to the board when necessary.

# Review and approve project-related information and ensure it is appropriately communicated within internal teams and to the DHL community.

Project Close-Out and Final Handover:

# Coordinate and participate in review boards (e.g., Project Board, Supplies Board).

# Complete all project close-out activities and audit reviews, ensuring a seamless handover of the completed project within the stipulated timeframe.

# Maintain a high level of professionalism, honesty, and integrity in delivering the project to meet international compliance standards.

# Foster a culture of service excellence, flexibility, and cost-consciousness throughout the project.

# Manage virtual teams effectively, ensuring resource allocation and commitment to achieving project objectives.

My responsibilities included the following

Internal

• Managing the Project Team and various work streams to deliver BD Facility Relocation to fulfil user requirements and to agreed budget, schedule and quality.

• Working closely with Country & Regional project teams including Engineering, Procurement, Real Estate, Legal, IT, Security, Operations, Finance and Operations Programmes to ensure all expertise is drawn on and contributes towards the success of the project.

• Directing and motivating project team members to deliver results according to agreed schedule and budget.

• Calling for timely board meetings and gate reviews to keep stakeholders updated about the progress of the project and to get necessary approvals and issue work orders.

• Gaining support of key stakeholders and senior management to ensure timely decisions and adequate resource deployment.

• Acting as a strong communications link between the Project Team, Regional Office and Senior Management.

External

• Working with Procurement and Engineering/work stream leaders to source appropriate suppliers who create the best value for DHL.

• Build and maintain supplier relationships and gain intelligence on latest technology & industry developments.

• Managing suppliers to ensure the highest standard of service/products are delivered.

• Working closely with the external Project Management Consultant (PMC), Technical Consultants (e.g. Structural Engineers, Architects, M&E), Building and MHS Contractors to direct and coordinate activities to ensure project success.

• Exploration of Go-Green opportunities within the scope of the project.

Local Government and Regulatory Bodies, Airport Authority, etc.

• Ensuring that all Local Country Regulatory Bodies' codes, regulations and laws are satisfied.

• Protecting DHL's interests in order to gain support and ensure successful project implementation.

• To Proactively control project budget, schedule and project management processes.

• To Provide regular project management updates and reporting.

• To Initiate Project Initiation Document and gain endorsement from key stakeholders.

• To Assign clear responsibilities to project team members including consultants.

• Ensuring work done by external consultants, contractors and suppliers is in accordance with specifications and quality requirements  quality check work produced by the project team.

• Reviewing and reporting to management any significant project issues or risks, including cost control, in compliance with the Project Initiation Document.

• Resolve conflicts within the project and prioritize conflicting requirements on site  escalate to

board as required.

• Reviewing and taking approval for project information released to internal teams and the DHL community.

• Coordination and participation in various review Boards (e.g., Project Board, Supplies Board, etc.).

• Completing Project Close Out Activities and any project audit reviews.

• To Plan, organize and direct an efficient and effective project team consisting of staff drawn from other functions over whom the incumbent has no direct authority.

• To Manage the allocation of appropriate resources and commitment of staff to achieve the project objectives.

• To Demonstrate strong managing, influencing, interpersonal and communication skills.

• To Develop a culture of quality, service excellence, flexibility and cost consciousness.

**4. HEAD OF PROJECTS and Project Director (2.3yrs)**

(1 Jan 2018 - 18 Mar 2020)

**AL-MUSLIM GROUP**

Area of Expertise:

Planning (0.7 yr), Operation & Maintenance (0.7 yr), Construction and Development (0.7 yr)

Duties/Responsibilities

Duties & Responsibilities:

Development & Construction Management:

• Oversee all construction planning, management, and operations for a large industrial group.

• Serve as Head of the Engineering and Construction Department, responsible for construction logistics and procurement.

• Lead a team of engineers, managers, and technicians, ensuring successful project delivery and operations.

• Manage the construction of a wide range of industrial buildings, including:

o An eight-story PEB steel building, 56,000 sqft per floor.

o Three steel sheds, each 100,000 sqft.

o A nine-story RCC building, 50,000 sqft per floor.

• Supervise renovation and interior works for factory complexes, as well as regular civil and plumbing maintenance and emergency repairs.

Project Management:

• Lead the construction of a state-of-the-art seven-story pre-fabricated steel building, a 380,000 sqft industrial facility in Savar, ensuring compliance with fire protection and building safety regulations.

• Oversee planning and construction for a mega project consisting of 75 twenty-story buildings, titled Bijoy Niketon, Postagola, Dhaka.

• Manage the construction of a three-basement, G+9 story luxurious RCC building at Plot-44, Road-7, Block-F, Banani, Dhaka.

Consultation & Procurement:

• Act as a consultant to the Managing Director for the procurement of lifts, generators, and other key industrial equipment.

• Lead the procurement process for all services related to construction and development, including selecting consultants for architectural, structural, MEP services, and obtaining LEED certification for Green Building.

• Oversee the engagement of civil contractors, pre-fabricated building erectors, and suppliers for construction materials.

• Advise the Managing Director on the recruitment of technical staff, such as engineers and technicians.

• Ensure and verify the quality of supplied goods, materials, and services to maintain high standards.

Specialized Responsibilities:

• Lead a team for retrofitting works following ACCORD guidelines to meet structural, fire, and electrical safety standards.

• Head the workshop team responsible for industrial furniture, tables, chairs, grills, flooring works, utility services, fire hydrant installation, sprinkler systems, fire door installations, steam line making, boiler and generator installations, HVAC system setup, and plumbing works.

Project Execution & Monitoring:

• Oversee the development of industrial projects from bare land, ensuring proper planning, design, and construction procurement activities.

• Develop feasibility studies and project management models to guide the execution process.

• Maintain cost control through effective inventory management and monitor site activities to ensure adherence to drawings and specifications.

• Ensure all projects meet operational execution plans and are completed to the highest quality standards, within the stipulated timelines.

**5. Project Director (1.0yrs)**

(1 Jan 2017 - 31 Dec 2017)

**GREEN SMART SHIRTS LIMITED (PDS MULTINATIONAL GROUP),**

Area of Expertise:

Planning (0.3 yr), Operation & Maintenance (0.3 yr), Project Management (0.3 yr)

Duties/Responsibilities

As Project Director at Green Smart Shirts Limited, a subsidiary of PDS Multinational Group, I was responsible for overseeing the construction, planning, and operations of the industrial group. I led the Engineering and Construction Department, managing logistics, procurement, and all aspects of the factory`s development.

I supervised the construction of a Green Platinum-certified factory complex, which included a 200,000 sqft, two-story, fully air-conditioned building, a 50,000 sqft, three-story facilities building, a utility building, warehouses, STP, helipad, gate house, internal road networks, drainage systems, and landscaping.

Key responsibilities included:

• Resolving local construction-related issues.

• Managing the procurement, supply, and storage of materials.

• Supervising site engineers and project engineers, ensuring quality assurance, quantity surveying, estimations, budgeting, and forecasting.

• Overseeing design checks, billing, and maintaining accountability in the project.

• Building and maintaining relationships with design professionals, banks, insurance companies, government departments, and law enforcement.

The factory complied with all safety regulations, including fire, ventilation, and energy efficiency standards. Under my supervision, the factory implemented energy-efficient glass, air-conditioning systems, and water-saving fixtures, achieving USGBC Green Platinum certification for sustainable construction.

**6. SENIOR GENERAL MANAGER (CIVIL) (1.1yrs)**

(1 Dec 2015 - 31 Dec 2016)

**MONDOL GROUP**

Area of Expertise:

Planning (0.3 yr), Operation & Maintenance (0.3 yr), Project Management/ Co-ordinator (0.3 yr)

Duties/Responsibilities

As Head of the Engineering and Construction Department at Mondol Group, I was responsible for overseeing all aspects of construction planning, management, and operations across various industrial and commercial projects. I also handled construction logistics and procurement.

Key Responsibilities:

• Led a large team of engineers, managers, and technicians, managing the construction of four nine-story RCC industrial buildings (30,000 sqft per floor) and three steel sheds (50,000 sqft each).

• Managed the renovation, interior works, and regular civil and plumbing maintenance for factory complexes.

• Supervised the construction of a nine-story commercial building at Uttara, Sector-03.

Consultation & Procurement:

• Advised the Managing Director on procuring fire safety equipment, including fire doors, extinguishers, alarm systems, and hydrant systems.

• Provided guidance on the procurement of lifts, generators, and other industrial equipment.

• Assisted in the selection and procurement of architectural, structural, and MEP consultants, as well as LEED certification for Green Building.

• Led the procurement of civil contractors, prefab building erectors, and suppliers of construction materials.

• Ensured quality control of all goods, materials, and services provided.

Project Development & Management:

• Oversaw the development of industrial projects from bare land, managing project planning, design, construction, and procurement activities.

• Prepared feasibility studies and project management models to ensure cost control through effective inventory management.

• Supervised site work to ensure compliance with designs and specifications.

Vendor & Tender Management:

• Managed tender processes and vendor relations, overseeing all civil works, construction, and finishing works for apartment buildings and other sites.

• Expert in handling finishing projects with strict time constraints, ensuring aesthetic quality and timely completion.

Additionally, I worked as an individual project manager and design consultant for Askan Makka Tower, a sixteen-story commercial-residential building with a single basement at Jatrabari Dholaipar.

**7. GENERAL MANAGER (ENGINEERING AND DEVELOPMENT)& COMPLIANCE (3.7yrs)**

(1 Apr 2012 - 30 Nov 2015)

**SUNMAN GROUP**

Area of Expertise:

Planning (1.2 yr), Sales & Marketing (1.2 yr), Project Management (1.2 yr)

Duties/Responsibilities

As General Manager (Development, Construction, Properties & Land) and Acting GM (Compliance), I was responsible for overseeing all construction, development, and compliance operations within the organization.

Key Responsibilities:

• Development & Construction:

o Led the planning, management, and operation of the group's industrial projects, including supervising the construction logistics and procurement.

o Managed multiple major projects, such as:

 The largest textile mill in any EPZ, located in IEPZ, Ishwardi, Pabna, worth 5 billion BDT, including a composite textile mill, large warehouses, garments buildings, and facilities for modern technology.

 Two 20-story commercial buildings (EBS Tower and Sunman Tower) in Dhaka, as well as a pre-fabricated industrial building for Hong Kong Denim Pvt. Ltd.

 Other projects like Sunman Pharmaceuticals, major mosque construction, and the development of an effluent treatment plant for Capital Paper and Board Mills.

• Compliance:

o Resolved audit-related issues and communicated with buyers, third parties, and regulatory bodies to ensure compliance with ACCORD, ALLIANCE, and safety standards.

o Managed procurement for fire safety systems, lifts, generators, and other industry-specific equipment.

o Worked on obtaining necessary permits and communicating with local authorities such as RAJUK, PDB, and the Environment Department.

• Land Management:

o Supervised the registration and legal processes related to the group's vast land holdings throughout the country, managing land tax, possession control, and documentation.

• Team Leadership:

o Led a team of engineers, managers, and technicians, ensuring effective execution and management of all construction-related tasks.

o Acted as a consultant to the Chairman on procurement, recruitment, quality assurance, and construction services, ensuring the successful delivery of major projects.

• Project Management:

o Oversaw project planning, budgeting, and forecasting, ensuring compliance with specifications and high-quality standards.

o Maintained relationships with design professionals, banks, insurance companies, government authorities, and law enforcement agencies to ensure smooth project execution.

Overall, I was responsible for ensuring the successful execution of large-scale projects, managing compliance, and overseeing the group's land and construction operations across Bangladesh and internationally.

**8. PROPERTY MANAGER CUM CHIEF ENGINEER (3.2yrs)**

(1 Feb 2009 - 31 Mar 2012)

**CARMENS.SPA , PALMY SHOES LTD.,**

Area of Expertise:

Planning (1.0 yr), Sales & Marketing (1.0 yr), Project Management (1.0 yr)

Duties/Responsibilities

• General Responsibilities:

o Managed all aspects related to construction, including planning, project management, procurement, and supply chain management.

o Supervised site engineers and project engineers, allocating duties and ensuring smooth operations.

o Ensured quality assurance, quantity surveying, estimations, budgeting, and forecasting for construction projects.

o Managed legal permissions and coordinated communications with various government authorities (REB, Environment Department, Land Office, DC Office, RHD, Industrial Inspector's Office, Labour Office, FSCD, etc.).

o Established and maintained relationships with design professionals, banks, insurance companies, and law enforcement agencies.

• Project Oversight:

o Led the development of industrial projects from scratch, managing operational execution plans, monitoring systems, and project development activities.

o Conducted feasibility studies and project management modeling, ensuring effective procurement and cost control through inventory management.

o Supervised construction work according to drawings and specifications, ensuring quality and timely completion.

• Maintenance Engineer Role:

o Acted as the Maintenance Engineer (Civil) for Golden Moon (BD) Ltd, SFB# 01, Comilla EPZ, and Palmy Shoes Limited, overseeing machinery installation, civil, plumbing, and electrical maintenance.

• Project Coordination:

o Managed project coordination, solving technical and managerial issues, conducting inspections, and ensuring compliance with project specifications.

o Prepared Bill of Quantities, cost estimates, invoices, and quality control measures.

o Worked closely with architects, consultants, and management to ensure smooth project execution.

• Additional Projects:

o Served as Project Manager for the construction of an 18-story commercial-residential building with a basement at Plot #147, Shantinagar, Dhaka, under FAR Homes, a sister concern of FAR

Group.

In summary, I was responsible for overseeing construction projects from planning through execution, including procurement, legal permissions, maintenance, and coordination with various stakeholders to ensure successful and timely project delivery.

**9. PROJECT MANAGER (2.1yrs)**

(1 Jan 2007 - 31 Jan 2009)

**PROFESSIONAL BUILDERS LIMITED**

Area of Expertise:

Planning (0.7 yr), Operation & Maintenance (0.7 yr), Project Management (0.7 yr)

Duties/Responsibilities

• Project Management & Supervision:

o Controlled and allocated duties to site engineers and project engineers, ensuring smooth operations.

o Managed procurement, supply, and inventory, overseeing quality assurance, quantity surveying, estimations, and budgeting.

o Ensured compliance with legal permissions (land use, plan-pass) and coordinated communications with RAJUK, DESCO, WASA, DCC, RHD, PWD, Environment Department, Fire Service, and other government authorities.

• Project Development & Planning:

o Oversaw the development of projects from planning to execution, ensuring operational plans, monitoring systems, and construction procurement activities were in place.

o Prepared feasibility studies and project management models, ensuring cost control and effective inventory management.

• Coordination & Relationship Management:

o Maintained relationships with design professionals, banks, insurance companies, and various government departments.

o Managed coordination between architects, consultants, and management, ensuring quality control, time management, and cost control.

• Quality Assurance & Vendor Management:

o Prepared Bills of Quantities, cost estimates, and invoices, conducting inspections and checks for work on-site.

o Managed tendering and vendor relations, ensuring the timely delivery of construction works and finishing projects.

• Expertise in Finishing & After-Sales:

o Specialized in managing and executing finishing works within tough time constraints while ensuring aesthetic quality.

o Handled after-sales customer relations, ensuring client satisfaction post-project completion.

In summary, I was responsible for overseeing all aspects of project management, procurement, quality assurance, and legal compliance, with a focus on finishing projects on time and managing customer relations effectively.

RELIANCE

**10. Project Engineer & Project Manager (4.7yrs)**
(1 May 2002 - 31 Dec 2006)

**RELIANCE HOLDINGS LIMITED**

Area of Expertise:

Project Management/ Co-ordinator (1.9 yr), Planning (4.6 yr)

Duties/Responsibilities

• Overall Project Control & Management:

o Reported directly to the Managing Director, overseeing all aspects of land requisition, approvals, construction, and vendor management.

o Managed and supervised civil works, construction, and finishing works across multiple apartment building sites, including land development projects in Badda, Dumni, Khilkhet, and Nurer-chala, Dhaka.

• Land Development & Infrastructure:

o Led land development projects, including land filling and the construction of essential infrastructure such as internal roads, sewers, gas lines, and electrical lines.

o Conducted layout, surveying, and plot demarcation for various projects.

• Project & Vendor Management:

o Managed procurement and supervised an engineering team for the construction of several apartment buildings in joint ventures, including major projects in Basundhara.

o Projects included the Reliance series, such as Spring Mist, Discovery, Habib Garden, Elias Garden, Jenifar, Prottasha, Niloy, Anuvab, Kazim Manjil, Khaleda Garden, Purabi Homes, Peace Hut, Rosemare, Royal Epic, Proshanti, and Maple Leaf.

In summary, I was responsible for the comprehensive management of land development, construction, and infrastructure projects, ensuring smooth operations from land requisition through to project completion and vendor management.
