• Check and processing sub-contractor bills and invoice
• Provide technical advice to the teams.
• Weekly and Monthly progress report preparation and presentation.
• Attend meeting with departments/clients and resolve the issues related to Projects.
• Supervise construction activities to ensure compliance with design specifications, building codes and safety regulations

• Monitor and track project progress to ensure adherence to schedule and budgets
• Identify potential project risks and develop mitigation strategies
• Conduct regular site inspections to assess work quality and resolve any issues that may arise
• Possess sound knowledge of construction design and drawing. Able to estimate and perform cost analysis for civil construction projects.
• Verify vendors bills related to civil constructions
• Performs inspections and quality checks on materials, workmanship and finished products
• Forecasting design and construction timeline
• Work with management regarding design issues for advice, recommendations and corrections
• Complete company's all civil works /construction projects within desired work period.
• Conduct regular meeting with the teams of project department for proper coordination and cooperation and improvement of efficiency of works.
• Coordinate and communicate with procurement department for ensuring timely availability of all construction materials as per specification.

6. Project Engineer (2.4yrs)
(1 Jan 2009 - 31 May 2011)

D.B.L Group
Area of Expertise:
Operation & Maintenance (2.3 yr), Project Management (2.3 yr), Project Implementation (2.3 yr)

Duties/Responsibilities

• Land development.
• Layout setting
• Piling work
• Foundation work
• All Finishing works
• Tiles works
• Paint works
• Gas line connection works
• Electrical line connection works
• Water supply line connection works
• Manage and oversee the day-to-day project construction works
• Lead the field projects operations teams
• Taking responsibilities of all the problems that arises in the project.
• Developing and implementing all project check list for quality control of construction works.
• Ensure safety facilities of the project.
• Monitoring the test report of construction materials like sand, cement, stone chips, bricks, concrete,
reinforcement etc.
• Check all types of construction works and ensure quality of the works.
• Planning, Organizing, reviewing and supervising the construction works.

• Review the Architectural and structural drawings considering proper specifications and notes.
• Maintain efficient communication with Projects and departments
• Select suitable construction materials
• Processing sub-contractor bills and invoice
• Provide technical advice to the teams.
• Weekly and Monthly progress report preparation and presentation.
• Attend meeting with departments/clients and resolve the issues related to Projects.
• Ensure receipt of the bills according to the BOQ/Work done as per contract agreement
• Lead, manage, design, develop, create and maintain small scale through to large scale construction
project in a safe, timely and sustainable manner.
